

WORDENS PAST
PLACE NAMES INDEX
 Volume XXXIII
 Pages 2809–2912
 May 2012–February 2013
 Compiled by Gilbert S. Bahn
 for the
WORDEN FAMILY ASSOCIATION
 © Worden Family Association 2013

The main entries in this index are by state, province, and major country, each of which is shown in boldface and all upper case letters. Within each geographic category, references to the state, province, or country are listed first, followed by an alphabetical list of cities, counties, townships, and other locales. Users are encouraged to scan through the entire listing for their area of interest; some cities and towns are listed alphabetically under their county, others are listed by the city or town name. Thus, Yarmouth, Massachusetts, is listed both under Barnstable County and later in the index for those articles that identified it without the county name. County names and other subdivision names are always followed by a comma. Lakes, rivers, and other bodies of water are normally listed in the state or province within which they are located. Some bodies of water that run through numerous states, such as the Mississippi River, have separate listings.

Effort was made to identify misspellings and offer alternative spellings for archaic names. In each such instance, the Latin adverb *sic*, a shorthand for *sic erat scriptum* (thus was it written) follows the spelling as given in the author of the original *Wordens Past* article. The same feature is available for misplaced place names, such as those that were identified in the wrong county, state, or province in the original article.

Cited locations of authors of references are indexed, as perhaps being meaningful, but locations of publishers and printers are omitted. If the county was not mentioned in the *Wordens Past* article, it is not been searched for or inserted in this index. However, the county name may be shown by duplication from the page(s) preceding in the article.
