The main entries in this index are by state, province, and country, each of which is shown in **bold** and all UPPER CASE LETTERS. Within each geographic category, references to country, state, or province are listed first, followed by an alphabetical list of cities, counties, townships, and other locales, including battlegrounds, cemeteries, forts, and major government installations. Users are encouraged to scan through the entire listing for their state, province, county, or local jurisdiction of interest. Lakes, rivers, and other bodies of water are normally listed in the state or province within which they are located. Some bodies of water are in several states—such as the Ohio River—have separate listings.
